PHILOSOPHICAL, EDUCATIONAL, AND SCIENTIFIC BOOKS

Metaphysics of the Supernatural as Illustrated by Descartes

By LINA KAHN, Ph.D. 8vo, paper, pp. viii+66. $1.00 net.

Archives of Philosophy, No. 9.

This monograph is a very thorough study in a field that has been almost totally neglected. The influence of theological tradition upon the problems and the characteristic method of modern philosophy can hardly be exaggerated, an influence which it is necessary to understand before the more recent philosophical controversies can be wholly intelligible. The author shows us in Descartes a great scientific genius diverted into theological metaphysics.

Idea and Essence in the Philosophies of Hobbes and Spinoza

By ALBERT G. A. BALZ, Ph.D. 8vo, paper, pp. vii+86. $1.00 net.

Archives of Philosophy, No. 10.

In this monograph the author shows how the current interpretations of Hobbes and Spinoza are vitiated by introducing into these writers a psychology of mental states which is wholly foreign to them. He shows that what modern writers have regarded as mental are treated by Hobbes and Spinoza as either purely physical impressions, on the one hand, or as logical notions, on the other. Aside from the interest of this particular subject-matter, the present monograph represents a distinct contribution in the newer method of historical interpretation.
